Size: 10pt  
Style: Bold, centered

## ABSTRACT

Your paper abstract should convey the importance of your research in a concise and logical manner. The abstract is a synopsis of the original study that addresses the research problem, the information and methods used to address this problem and your conclusions. It should present only key points without exceeding a length of 100 words. The use of technical jargon and the citing of references should be avoided.

Size: 10pt  
Style: Italic

*Neural Network, Component-based*

Font: Times  
Size: 11pt  
Style: Bold

## 1.0 INTRODUCTION

This guide provides details to assist authors in preparing a paper for publication in KMICE 04' conference proceedings so that there is a consistency among papers. These instructions give guidance on layout, style, illustrations and references and serve as a model for authors to emulate. Please follow these specifications closely as papers which do not meet the standards laid down, will not be published.

## 2.0 STYLE OF MANUSCRIPT

Manuscripts must be in English and prepared on A4 size paper (210mm X 297mm) in two column-format with 2.5cm margins from top and bottom, and 1.5cm from left and right, leaving a gutter width of 0.5 between columns.

Centered at top of the first page should be the complete title of the manuscript, author(s), affiliation(s), mailing and email

address(es). This is followed by the abstracts under the heading **ABSTRACT**, keywords under the heading **Keywords** and followed by the text. The text should be typed in single space, using a font similar to the one used in this text (Times, 10 points). Paragraphs should be separated by single spacing. Each manuscript should not exceed 10 pages including illustrations and tables.

### Sections and Subsections

Sections and subsections should be numbered and titled as 1.0, 2.0, etc. and 1.1, 1.2, 2.1, 2.2, 2.2.1, etc. Capital letters should be used for the section titles. For subsections, the first letter of each word should be in capital letter and followed by small letters.

### Identification

Please avoid including headers, footers or page numbers in your submission. These will be added in the final publications.

## 3.0 TABLES AND FIGURES

Figures should be labeled with "Figure" and tables with "Table" and should be numbered sequentially, for example, Figure 1, Figure 2 and so on (refer to table 1 and figure 1). The figure numbers and titles should be placed below the figures, and the table numbers and titles should be placed on top of the tables. The first letter of the title should be placed in the middle of the page between the left and right margins. Tables, illustrations and the corresponding text should be placed on the same page as far as possible. Otherwise they may be placed on the immediate following page. Its size should be smaller than the type area.

Font: Times  
Size: 9 pt  
Style: italics

Table 1: Center table captions above the tables.

Pembelajaran (%)	Pengujian (%)
88.5	87.3
82.6	85.4
83.1	82.6
87.5	86.0
88.1	85.7

Font: Times  
Size: 8-10 pt

Figure 1: Description is placed right below the figure

#### 4.0 EQUATIONS

When numbering equations, enclose numbers in parentheses and place flush with right-hand margin of the column. Equations must be typed, not inserted.

Example:

$$Net_j = w_0 + \sum_{i=1}^n x_i w_{ij} \quad (1)$$

#### 5.0 REFERENCES

Font: Times  
Size: 11pt  
Style: Bold

Relevant publications accessible to the public (i.e., articles in standard journals and open conference proceedings) should be cited. References cited in the text should include the last name of the author(s) and the year of publication, for example (Bush, 1945) or (Salton and McGill, 1983). When the citation(s) includes three or more authors, only the first author should be mentioned by name, for example, (Foley et al., 1990). A trailing lower case letter should distinguish multiple papers by the same author(s) published during a single year, for example (Winograd and Flores, 1987a). Multiple citations in the same sentence should be enclosed within brackets and separated by semicolons, for example, (Halasz, 1988; VanRijsbergen, 1975).

The reference list should be arranged alphabetically by the author's last name, followed by the date and should be typed in single space with justify alignment. In the case of multiple listings by a single author, the earliest publication appears first. When an author is listed both as a single author and as a senior author with coauthor(s), all of the single-author listings precede the multiple-author listings, with the latter arranged alphabetically by last name of successive authors. Again, chronological order is used for multiple papers by the same set of authors. The lowercase letter used in the citation to distinguish multiple papers by the same author(s) in the same year should be displayed in the reference list.
